

MUSIC AND AI

Offered jointly by the Bienen School of Music and the McCormick School of Engineering and Applied Science, Music and Artificial Intelligence is an interdisciplinary certificate program that equips students to be critical users and thoughtful designers of AI technologies in music from the perspectives of educators, performers, theorists, and listeners. Through coursework students will explore key applications of AI and machine learning in music, including music information retrieval, recommendation systems, performance systems, and generative composition.

Note: This is not a composition certificate. Coursework will not promote or include instruction on developing generative AI music compositions.
